RETURN RECEIPT REQUESTED**

October 25, 2006

Mr. David N. Bittel
Arizona Portland Cement Company
P.O. Box 338
Rillito, AZ 85654

Dear Mr. Bittel:

Subject: Administrative Amendment #41711 to Operating Permit #M190310P-00
Place ID #2869

Enclosed is the administrative amendment #41711 for the change of location of the ambient monitoring equipment in Operating Permit #M190310P1-00. In accordance with Arizona Revised Statutes, §49-430, this administrative amendment should be readily available at all times on the premises.

You are advised that a permit is a legally enforceable document. If your facility fails to comply with the provisions contained in its permit, you will be subject to enforcement action and could incur civil fines of up to ten thousand dollars per day under A.R.S. §49-463 and/or be subject to criminal penalties in accordance with A.R.S. §49-464.

If you should have further questions, you can contact Scott Baggio at (602) 771-4310 or me at (602) 771-2308.

Sincerely,

Nancy C. Wrona, Director
Air Quality Division

ADMINISTRATIVE PERMIT AMENDMENT DESCRIPTION

COPY

This administrative amendment is for Arizona Portland Cement Company, the Permittee, ~~for relocation of its Rillito Northwest ambient monitoring equipment near its Portland cement plant in Rillito, Pima County, Arizona.~~ The monitoring equipment is being relocated because the property is being sold. The equipment is being relocated to the Rillito Water Well site. This site is approximately 190 yards from the original site, and meets all of the siting criteria in 40 CFR §58, Appendix E, Section 8 (Probe and Monitoring Path Siting Criteria for Ambient Air Quality Monitoring).

This administrative amendment changes the physical address for the Rillito NW site in APCC's Title V operating permit.

**Addenda (Administrative Amendment) #41711
to Operating Permit #M190310P1-00
for
Arizona Portland Cement Company**

Condition XI.E of Attachment "B" of Operating Permit M190310P1-00 shall be amended to read as follows:

E. PM₁₀ Site and Sampling Frequency

The PM₁₀ samplers shall be operated at the Rillito NW site (8840 West Robinson Street). Samples shall be collected on every-sixth-day, midnight to midnight sampling schedule. This schedule shall be offset by three days from the national every-sixth-day sampling schedule. The attainment status of the Rillito PM₁₀ Planning Area will also be monitored by ADEQ at the Rillito NW site on the national every-sixth-day schedule. The monitoring schedule specified for Permittee will be reviewed and may be subject to change as the attainment status of the Rillito Planning Area progresses.

In the event that a sampler malfunction or other circumstances beyond Permittee's control prevents the successful collection of the required samples on the schedule specified above, special midnight to midnight samples shall be substituted starting as soon as practicable after the correction of the malfunction problem to comply with the data recovery specifications listed in CFR documents. Sampling, as may be required by ADEQ, during a facility upset or failure of air pollution control equipment shall supersede the every-sixth-day schedule specified above.
