

Clean Colorado River Alliance

Mission

Develop recommendations to address existing water quality issues to ensure Colorado River water quality meets the needs of Arizona, now and in the future

Objectives

1. Develop a plan to create a regional approach to address Colorado River water quality issues
2. Document and prioritize water quality improvement projects to be implemented
3. Document funding needs and sources and identify processes to secure funding
4. Develop an action plan to secure and direct funding and implement the water quality improvement projects identified
