

Name of Area, Facility, or Project: _____

AZPDES De Minimis General Permit (DMGP) AZG2010-001
TABLE 2. DESCRIPTION OF UNSPECIFIED DISCHARGE LOCATIONS

Use this form for categories of anticipated discharges that are too numerous to specify (e.g., fire hydrants), or discharges with unpredictable locations (e.g., repair of line breaks). Specify the typical planned monitoring parameters and sampling points for each category. The use of this form for discharges to a perennial or intermittent water, OAW, or impaired water is subject to ADEQ approval. All disinfection water must be dechlorinated per BMP requirements in Part IV.D.2.c of the general permit.

Type of Unspecified Discharge Location	Estimated Volume, Frequency, and Duration of Discharge	Sampling Location (general description of where samples would be taken during a discharge)	Receiving Water Type/Use	Planned Monitoring Parameters (give monitoring parameters for each type of water that discharge may reach)
